Project selection. Execution of an order

7.3. Through the Platform, the Investor has the opportunity to make an investment in the listed Projects. After selecting a Project or offering in which they wish to invest, the Investors can submit an order for the conclusion of a Loan Agreement through the available functionalities of the Platform.

7.4. The Platform's software executes orders in the order they are received. When executing an order, the software automatically, without any discretion, processes the order subscribed in terms of sender of the order, the amount of the investment, the place and time of submission of the order, etc. The software's algorithm does not allow for changes to the operating model, nor external interference or influence in the execution of specific orders, such as "manual" adjustments by employees. The software algorithm

Version:	1
Date:	12.03.2025

does not allow unauthorised changes to orders once executed or to the order in which they are received.

7.5. The Platform offers two ways to invest:

a) Manually

The Investor enters the amount they wish to invest in a particular Project. By clicking on a specially marked button, the Investor consents to enter into a Loan Agreement under the terms of the KIIS to that Project.

b) Filtering and using the “Auto Invest” function

Afranga may introduce in the future a functionality on the Platform where the Investor can filter Projects according to criteria set forth by them in the Platform. Different criteria combinations may be proposed by Afranga in this regard or the Investor may choose manually what criteria to apply. The Investors can enter the amount they wish to invest in more than one Project at the same time. The amount indicated by the Investor is allocated under different Projects according to criteria predefined by the Investor until it is exhausted. By clicking on a specially marked button, the Investors give their explicit consent for the conclusion of Loan Agreements in all the Projects they have filtered.

Fundraising

7.6. In the KIIS of each Project the Project Owner indicates the amount of funds to be borrowed under a Project proposal and the deadline for borrowing funds.

7.7. Once the maximum parameters of the proposal have been reached, such as: the maximum amount of funds to be lent and the expiry date of the proposal, the Project will cease to be active.

7.9. Non-sophisticated Investors are granted a pre-agreement reflection period in accordance with Article 22 of the Regulation.

Agreement conclusion

7.10. The Loan Agreement between the Investor and the Project Owner is deemed to be concluded after the automatic processing of the Investor’s order to make the investment. The Project Owner explicitly agrees that by submitting a Project on the Platform all Loan Agreements concluded at the initiative of Investors are binding for the Project Owner which has signed them as per art. 4.8. above (without any need for further confirmation).

Version:	1
Date:	12.03.2025

7.11. The reflection period under clause 7.9, during which Non-sophisticated Investors may withdraw their investment order, starts from the moment the investment order is made and expires in 4 (four) calendar days. During reflection period the funds designated by an Investor to be granted under a Loan Agreement shall be deducted in the User Profile and cannot be invested in any other Project. If a right of withdrawal is exercised, the funds will be returned to the User Profile.

7.12. If a withdrawal is made during the reflection period, the Non-sophisticated Investor is not required to point out a reason and shall not suffer any penalty.

7.13. The withdrawal procedure is similar to that of placing an order, whereby the Investors have the option to withdraw the order by clicking on a specially marked button via their investment account on the Platform.

Completion of the fundraising. Notifying the Project Owner of Investor interest in a Project

7.14. Once the maximum parameters of the crowdfunding Project campaign have been reached, or the campaign has expired (except in the case of a Project being withdrawn), the fundraising process ends.
